Tennis Club Is Organized For Coming Season

W. J. Blankstein, President of the Club This Year -- Will Hold Winter Drive and Dance

With W. J. Blankstein at president, Miss R. McArthur, vice president, and William McLean secretary-treasurer, the Bassano Tennis Club is about to begin the 1935 season. The annual meeting was held in the office of Wm. McLean last Thursday evening, Mar. 28th, and although the attendance was unavailably small, it was made known by those present that there was considerable interest in tennis this spring, and a successful season was anticipated.

W. J. Smith and R. Donaldson were elected to the executive, which also included the president, vice president, and secretary-treasurer.

The financial statement showed a small deficit from last year, but it was hoped to find no difficulty in paying off the amount.

The annual club dance will be held on Friday, April 18th, and a committee was appointed to arrange the details. The affair this year will be a white dress and dance combined, and invitations are to be sent out. The Tennis Club dance have always been popular, and it is expected that a large crowd will attend the affair on Friday, April 18th.

The fees for this season were fixed at \$5.00 for gentlemen, \$3.00 for ladies, and \$2.00 for high school pupils. A notice was also sent out, in which they would be empowered to levy an additional \$2.00 per member for ladies and gentlemen.

Rosemary News

ROSEMARY, April 4--Eddie Moser returned from the States last Friday night.

Mr. and Mrs. Simmons and family are moving to Calgary.

Mr. Parks' mother is visiting in Rosemary.

Bill Taftmott motored to Bassano Tuesday.

Leonard McDonald was visiting in the Colony Wednesday.

The Easter program was very much enjoyed by the large crowd. Some of the visitors who took part in the program were: Mr. and Mrs. Moores of Brooks; Mr. Farnsworth and brother, from Canby; Mr. Woodward, of Dubuque, rendered a solo. What was enjoyed by all.

SCHOOL REPORT
Averages given as obtained at the Easter Exam. Names given in order of merit, except where equal.

Teacher, Faye A. Robinson.

GRADE 1
Nora Posing; Jimmie Hall 96; Leonard Parks; 94; Ronald Simpson; 92; Paul DeBussche; 92; June Simpson; 90; Dorothy McClelland 89.

GRADE 2
Robert Simpson 91; Willie Sharpe 87; Albert Buckley 86; Ella Condrich 87; Irene Adams 81.

GRADE 3
John Eastman 83; Beulah Simpson 82; Charles Brown 80; Betty Adams 80.

R. D. Purdy Is New Manager Of Wheat Pool Elevators

Announcement was made Thursday by officials of the Alberta Wheat Pool of the retirement of C. M. Hall as manager of the Alberta Wheat Elevators, Limited, and the appointment of R. D. Purdy, manager of the Alberta Wheat Pool, to succeed him.

Mr. Purdy will act as manager of both the Wheat Pool and Pool Elevators, Limited. The retiring manager, Mr. Hall, had occupied the position of manager of the pool elevators for the past ten and one-half years. The pool announcement also stated that T. R. Oliver, in addition to his present duties as assistant manager of Alberta Pool Elevators Limited, had been appointed assistant manager of the Alberta Wheat Pool. "This will bring all the departments of the pool," continued the official statement, "including the Alberta Pool Elevators, Limited, under one central management."

A native of Brighton, Ont., Mr. Purdy has been a resident of Alberta since 1905. He was for many years with the Merchants' Bank and subsequently the Bank of Montreal. Four years ago, in January 1935, he became manager of the Alberta Wheat Pool.

MAIN HIGHWAY NOW GETS REGULAR DRAINAGE

A. A. MacGregor is now working on the main highway from Canby to the Frank Walker farm. Mr. MacGregor has a contract for draining this road, and he makes one complete round every week. What necessary he will drag it once or twice a week.

FARM OPERATIONS

Early spring weather has enabled farmers to accomplish a great amount of work in the field, and many are about ready for seeding. It is expected that the average snow this year will considerably exceed that of 1935.

87; Naima Hamar 84; Chester Narum 83; Helen Condrich 29; John Neufeld not ranked.

GRADE 4
Tommy Sharpe 90; Pearl Eastman 88; Dorothy Adams 63; Katie Neufeld not ranked.

Town Council Gets Assurance There Will Be No Delay In Building Sewage Disposal Plant

Bassano's Water Supply is to be Freed From Danger of Contamination--City of Calgary to Invest \$50,000 a Year for Sewage Disposal Works

Definite statements as to how and when the City of Calgary will build sewage disposal works have at last been received by the council of the Town of Bassano. Calgary will spend not less than \$50,000 a year during this and the next four years for the building of sewage disposal works, making a total of \$200,000 for the purpose.

This was the information conveyed in a letter from the provincial Department of Health, and read at the council meeting last Tuesday evening, April 2nd.

The practice of the City of Calgary in dumping raw sewage into the Bow River, contrary to the provincial Health Act, and thereby jeopardizing the health of the citizens of Bassano, has been a source of much concern by Bassano's town council for many years. After many years delay, and much writing and personal interviewing, the council a few months ago managed to get the provincial Department of Health to act in the matter and get from Calgary assurance that the city would build sewage disposal works. Calgary gave this assurance, promising that within the next five years the necessary works would be built. This was not good enough for Mayor Hedra and the town council. They wanted action at once, and sent a protest to the provincial Health Department, urging that Calgary take immediate action in the building of the works.

The letter from the department gave the satisfactory information that beginning this year Calgary would comply with the health act by installing one unit of the disposal works, and other units will be installed during each of the next four years.

By-Law Not Necessary
The letter further stated that the amount of \$50,000 which Calgary would spend for this purpose, would be put to a vote of the people. The city would be permitted to spend the money by right of special provincial legislation.

General Business
The council meeting was held Tuesday evening, Monday, the regular meeting day, being a holiday.

Town Engineer Frank Mead turned in his monthly report which was accepted. Four graves were dug during the month. The old King pool room and billiard parlor was torn down, and a fence erected across the front of the now vacant lot. "Constitution" was done on several of the town houses.

A letter was received from the Bassano Board of Trade re the condition, the maintenance of the town. The matter was referred to the health and relief committee.

Accounts
The following accounts were read and passed for payment:

Royal Bank \$12.50
Bassano Mail \$25.00
Telephone \$14.00
Bassano Hotel \$5.00
H. A. Holmes \$18.00
Harvey Smith \$16.78
W. S. Playfair \$4.00
A. M. McArthur \$3.00
Currie & Milroy, Ltd. \$21.80
R. A. Travis \$5.50
Attorney General \$6.00
Bassano Board of Trade \$10.00
United Elec. & Eng. Co. \$15.00
Bassano School Dist. \$100.00
Pay Roll for March \$64.65

Mayorville Farmers To Give Supper For The Firefighters

In appreciation of the prompt and willing assistance given by neighbors and friends in fighting the prairie fire last fall, three Mayorville farmers will give a supper and dance in the U. F. A. Hall at Milo, on Wednesday, April 16th.

The farmers who are giving this affair are: W. L. Wall, Fred L. McKinnon, and Douglas Hardwick.

All those who helped battle the big blaze in Mayorville last fall are invited to the supper and dance.

RESULTS OF HIGH SCHOOL EXAMINATION

Senior Primer 85; Ralph Aronson 75; Quennie Beaudry 71; Eleanor Hays 69; John 72; Ruth McFarlane 70; Bernice McFarlane 68; Eunice Powell 68; Alta Hopkins 65; Donald L. Wall 64; Lloyd Leonard 63; Perry Johnston 60; Stanley Wright 59; Robert MacGregor 58; Andrew Ostro 57; Katherine Hunter 56; Burton Pout 55; Kate Macdonald 53; Richard Balthason 53; Agnes Dailley 45.

Local Amateurs Will Put On Play

To Raise Money For Masonic Community Hall Purposes

"Are You a Mason?" a hilarious comedy in three acts, will be presented at a Bassano audience in the near future under the auspices of the Bassano Masonic Property Association.

The play will be presented in the Masonic Community Hall, and the proceeds are to help pay off the indebtedness of the building.

GOLF NOTES

A few early golfers have been out on the links. The course was found to be in pretty fair condition, ready for a heavy growth of weeds along some parts of the ditch.

The club will hold their annual meeting at an early date.

Lon Chaney Has Wonderful Role

Lon Chaney donned his first "false moustache" in eleven years; studied several days in a hospital to imitate the actions of a man who has mastered the intricate art of slight of hand to be able to perform the feats required by his latest screen character.

This odd form of preparation was necessary in filming "West of Zambou," Metro-Goldwyn-Mayers vanguard in the new series of films, in which Chaney comes to the Gem Theatre on Friday and Saturday April 5th and 6th.

The play is a "white voodoo" and former stage magician, who paralyzed from the injuries he received in a fight with the man who had robbed him of his sister's affection, trails his enemy through the wilds, terrorizing a tribe of natives with his strange "magic" and eventually accomplishing a feat of vengeance that turns about and destroys him.

A complete replica of an African jungle was built at the studio for the picture. Tropical plants were made to grow by artificial heat. Several hundred natives take part in weird voodoo ceremonies, featuring African "devil masks" and other strange accoutrements, and a number of spectacular exhibitions of mystery enhance the dramatic situation.

"The Hellmuth Trial" will feature a program for Monday and Tuesday. The program is a story of a fascinating mystery tale which was published in the Saturday Evening Post.

"Chickadee" a comedy as light as a soap bubble, is booked for Wednesday and Thursday of next week, April 10th and 11th. The picture is a comedy in which the star is selling a novel of the same name. A most fascinating and humorous picture of a girl whom four out of five men would love.

Another Xane Grey picture is coming Friday and Saturday next week. It is "The Vanishing Pioneer," in which Jack Holt stars as the hero of the desert west.

Canada's Future

In a very fine address by Mr. Graham Spry, secretary of the Association of Canadian Clubs, and printed in "The Canadian Nation," the subject of Canadian unity is dealt with under the title "One Nation, Two Cultures" which was likewise the heading over the article appearing in this column last week. In fact last week's article was inspired by Mr. Spry's address.

In his speech, Mr. Spry argued that, above all, the two Canadian peoples should be frank with each other, speak out their feelings freely and courteously, and attack that underlying menace, the fear, the suspicion which breeds ignorance, and working for common national ends, working the same national institutions and developing the same national spirit, they will learn to know each other, to recognize each as a Canadian, to feel a sense, not of fear, but of partnership. Then he said:

"One nation, two cultures, one nationality, two races, one loyalty, two loyalties, on this the Dominion of Canada is founded, on this the partnership rests by solemn contract, by natural trust. And thus it must abide or perish. Let it abide, and the nation will grow greater, and the world richer; but two races, full of spirit, rich in the heritage that time endures, a tongue, a culture, such as ours, cannot be divided, and time endures in unity as one, secure, secure, partners in the development of the north-american, which we are fortunate successors. Let it fall, let two seek to dominate race, let prejudice take its reign and rule more stoutly through the time, those that unite us and confederation, and the peoples of Canada, the peoples of Canada, thrust towards a future, dark and impenetrable."

Looking back over the sixty-six years of Confederation, can any one imagine what the position of the present Dominion of Canada would have been if the Canadian people of both races had not agreed to link their differences and agree upon compromise policies and enter into a solemn compact with each other, both for the present and the future. This last agreement not been reached there would have been no Confederation. Had there been no Confederation, the Dominion of Canada would have been the status of British North America today.

Would it be British? It is extremely doubtful. Long ere this it is highly probable that large sections of what is now Canada would have become merged in the United States. Certainly it is not the Confederation, the isolated Crown colonies would have remained weak, undeveloped. Instead, we have a great and prosperous Dominion, rapidly forging to the front as one of the great nations of the world, a tower of strength to the Empire, and already exerting no mean influence in the councils of the nations. The union effected by the solemn guarantees of the act of Confederation was not alone the creation of the Dominion; it was the salvation of the country at large.

Not only must the letter of that contract be lived up to, but the spirit must be observed. Failure on the part of the Canadian people, whether of British or French extraction, to recognize both the letter and the spirit of the union effected by Confederation will be fatal to its existence. And if Confederation fails, what are we put in its place? Confederation is weakened by aiming tactics on the part of one race against the other, and if Confederation is weakened, it must be replaced. On the other hand, mutual acceptance of the spirit of the Confederation pact, which we all boast annually on Dominion Day, will add strength to the structure, and enable a united Canadian people to resist all attacks upon their sovereignty and develop in peace that heritage.

As Mr. Graham Spry truly states, any other future for Canada, but that bound up in full acceptance of terms and spirit of the Confederation pact is indeed dark and impenetrable.

Fruit Values Decreased

During the month of June last year, Montreal received 93 carloads of imported strawberries, and a full carload from Ontario. In 1927, Canada imported fruit products worth, on a wholesale basis, \$30,296,744. According to the latest fruit statistics, the value of fruits produced in Canada from 1921 to 1926 decreased 20 per cent., yet, in the same time, agricultural values increased approximately 20 per cent. and poultry increased 30 per cent.

So Sympathetic

Mr. Morninggall—Where to your magnificent big dog? You don't mean to tell me you've sold him. Mr. Nickleplace—Yes, we sold him. It seemed a shame for a dog to occupy that commodious dog house this winter when so many people are homeless and we disposed of him and rented his home to an artist.

Women, in some provinces of India, have been eligible to vote since 1924.

To Check "FLU," Grippe

Fights the Germs in the Throat Before They Invade Other Parts of the Body.

EFFECTIVE PREVENTIVE MEASURES EXPLAINED

Simple precautions taken now will enable you to fight dreaded "Flu" which is sweeping rapidly through the whole country. The germs of influenza gain access to the body through the mouth and throat. Keep the throat healthy and you go a long way towards stopping the trouble. An effective means of prevention is to gargle the throat three or four times daily with NERVINE. Half a teaspoonful of NERVINE in water makes a most efficient gargle. The germ-killing properties of NERVINE quickly destroy bacteria in the mouth or throat. If the chest is sore, or if the throat is hoarse, if you have a cough—be sure, to rub the neck and chest with NERVINE. Every drop of it will rub in, and out will come the contagion.

Of course it is absolutely necessary to keep the system with Dr. Hamilton's Pills which stimulate the eliminating organs, and rid the system of disease-breeding wastes. This combination treatment of NERVINE and Dr. Hamilton's Pills will give prompt, and entirely satisfactory, results.

Prisoner For Eight Years

Russian Boy Punished By Father For Joining Red Army

A story of an eight-year imprisonment of a boy by his father in a pit near their hut in the village of Barchukovo, Kuybyshev province, has been brought to Moscow. In 1918 young Ivanov, joined the Red Army, and three years later returned to his native village with enthusiasm for the new order. His reactionary father told him "the red army marches against the Czars and you must not serve its ranks."

According to the report, that night old Ivanov dug a deep cave in his garden and blinding his son with a foot threw him into the pit apparently to keep him there until the return of the old order. Recently the father died and the villagers, changing upon the living grave, extricated the worn and emaciated man who although only 21 years of age had some twenty years' life. He was said to have been placed in a hospital.

PAINS IN THE BACK

These Are Usually Due To A Weakened Condition Of The Blood

The muscles of the back are constantly under heavy strain, and have but little rest throughout the day. They therefore need a tonic to maintain their strength and to keep them from becoming weak and sore. This tonic should be taken daily to keep the blood in good condition and to give the muscles the strength they need.

Backache seldom or never means kidney trouble, unless it is accompanied by other symptoms. The backache is usually due to a weakened condition of the blood. The blood is the life of the body, and if it is weak, the muscles will be weak, and the back will be sore. The blood should be kept in good condition by taking a tonic daily.

Capture Will Be Painless

New Invention To Be Used On Animals For Durable Zoo

For the first time in history wild animals are to be captured painlessly for the Durbur Zoo. Authorities of Pretoria Zoo have commissioned Captain Barnett Harris to invent a painless method of capturing wild animals.

This bullet is practically neutral to a hypodermic needle, so the animal who receives it will feel no more than it if it had been brushed by a thorn. The bullet itself contains drugs.

The worms that infest children from their birth are of two kinds, those that feed in the intestines, and those that feed in the blood. The worms that feed in the intestines are the most dangerous, as they cling to the walls of the intestines and if not interfered with grow huge. Miller's Worm Powders dislodge both kinds and while expelling them from the system serve to protect the damage they have caused.

Speeded Up Paint Job

Mike was engaged to do a job for Mr. Smith.

After a while he came in saying the job was completed and asked for his money.

"But, Mike, I wanted two coats of paint on that building," said Mr. Smith.

"Begorra, you've got it," said Mike. "I mixed the first coat with red paint for the second and put both coats on at the same time. Speed is my motto."

The trouble about mild weather which saves fuel bills is the fact that too often the saving has to be paid to the doctor.

To have the children sound and healthy is the first care of a mother. They cannot be healthy if troubled with worms. Use Mother Graves' Worm Exterminator.

Bookmakers are more numerous in London than auctioneers and horse gauds; there are 14,641 "bookies" to 14,284 of the other two.

Canadians Have Advantage

Standard of Living Much Higher Than in Many Atlantic Countries

People who complain that it is hard enough to make a bare living in this country, are apt to overlook the fact that the average citizen of Canada and United States is living on a scale that has been hitherto unknown in the history of the world and that is unknown even in every other country. Since the war the purchasing power of money is more or less on a level between Canada and the Old Country. Yet mechanical wages in this country are practically double what they are on the other side of the Atlantic. This means there is a tremendous difference between the standard of living among skilled workmen here and over there. A prominent authority on agricultural matters who recently visited Denmark and on his return told the farmers of Canada that he was satisfied to live on the same scale as the Danish farmers, they would all save a lot of money every year in Europe. Canadian farmers are farmers out working with the land and even the grandest and grandest farmer out in the world, such a thing as a small farmer over there owning an automobile is not known. We Canadians are living like millionaires in comparison, but we sometimes overlook the fact.

NEW BABY DISTURBS TIRED OFFICE WORKER

When my oldest boy was just a few weeks old he was baptised from my milk," says a Nebraska mother. "He kept me awake all night long, and I was so tired I could not do my work."

For the first time in history wild animals are to be captured painlessly for the Durbur Zoo. Authorities of Pretoria Zoo have commissioned Captain Barnett Harris to invent a painless method of capturing wild animals.

This bullet is practically neutral to a hypodermic needle, so the animal who receives it will feel no more than it if it had been brushed by a thorn. The bullet itself contains drugs.

Cold-Killed B.C. Beaver

Many Imprisoned in Lakes Which Were Frozen To Bottom

Thousands of beaver are believed to have perished in their holes in the lakes and streams of the interior British Columbia as a result of the recent protracted cold spell.

Harry Macdonald, who has traplines in the Aberdeen Lake and Grizzly Swamp country, reports that many of the little animals are dead in the higher altitudes and he bases his belief on the observations of a woodsman of many years experience. When all is well in the beaver hole said Smith, snow soon melts on the tops. Now there are heavy blankets of snow on all the houses along the traplines.

Smith believes that as the water was low in the lakes the entrance to the beaver holes was in shallow water. Heavy frosts came before the snow. The result is that many lakes are frozen to the bottom and the beaver imprisoned therein.

CORNS

Relief in 2 Minutes

Just a drop or two of Putnam's Corn Remedy, and the pain is away. Relief is almost instantaneous. This is the famous remedy which has been used for many years, and is now being sold at every drug store.

Development Of Sheep Industry

Alberta Shipped 10,000 Head To B.C.

The sheep industry from a ranch point of view shows signs of development in Western Canada, particularly in Alberta. A. Macmillan, chief of the Dominion Livestock Branch, last fall upwards of 10,000 head of ewe stock were bought in Alberta and shipped to the interior points of British Columbia, he pointed out.

Makes Breathing Easy. The construction of the air passages and the struggle for breath too familiar to many of asthmatic trouble, cannot deny Dr. J. D. Kellogg's Asthma Remedy. This is the famous remedy which is known far and wide for its complete effectiveness in even the very severe conditions. It is no truce, experimental preparation, but one with many years of strong service behind it. Buy it from your nearest dealer.

Motor Trucks Replace Horses

Have Proved a Success In Alberta Logging Camps

Horses are going out of favor in the woods and big motor trucks are taking their place, according to Art Haddock, sub-chief fire ranger for the western section of central Alberta, who has recently completed a year of the logging camps. The main line of the C.N.R. Owing to the lack of snow in the early part of the season, the logging camps are being used in the camps along the St. Lawrence River Valley and have proved to be a success. Night and day the trucks are being used along the line, and a load of ties in the trucks and more on trailers behind. Apart from the weather conditions, the long haul to the railway, sometimes 20 miles or more makes it expedient to haul ties with trucks, and they do not need the rest that horses require.

A Household Medicine

They are acquainted with the stirring properties of Dr. Thomas' Electric Oil in the treatment of many ailments would not be without it in the house. It is truly a household medicine, and as it is effective in dealing with many ordinary complaints it is an indispensable medicine. So, keep it at hand, as the call for it may come most unexpectedly.

Plate Inside Solid Stone

Archaeologists Believe It Is More Than 1,000 Years Old

An earthenware plate believed of pre-Incan origin was discovered inside a solid piece of stone by workmen blasting at a quarry near the coast of Lima, Peru. Archaeologists believed the plate was buried in sand which later turned to mudstone by the action of the ocean. If the theory is true it would indicate the age of the plate was more than 1,000 years old, belonging to a coastal civilization at present unknown, they said.

The spinning and weaving of cotton is one of the most important and largest of the manufacturing industries in Portugal.

Up to well into 19th century, in England, forgery was punishable with death.

Minard's Liniment for the Grippe and Flu.

Reduce the Acids

Rick stomachs, sour stomachs and indigestion usually mean excess acid. The stomach nerves are overstimulated. Too much acid makes the stomach and intestines sour. All acids kill instantly. The best form is Phillips' Milk of Magnesia, because one tablespoon, tasteless, does neutralize many times its volume in acid. Since its invention 50 years ago, it has remained the standard with physicians everywhere.

Take a spoonful of water and your unhappy condition, will probably end in five minutes. Then you will always know what to do. Crude and harmful methods will never appeal to you. To prove this for your own sake, it may save a great many disagreeable hours. Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions, say, druggists.

Utilizing Waste Product

Hot Water From Public Factories Cleans Ice From Streets

Hot water as a waste product from ice plants and other factories of Peshawar, is being used by the city highway department to remove snow and ice from the highways. Street sprinklers and flushers are fitted with the hot water and driven to the downtown streets. With one sprinkler following another, both directing streams of hot water onto the pavement, snow and ice melt immediately and are drained away. The hot water, obtained free, saves the city large amounts usually spent shoveling and hauling snow off the streets.

Unusual Air-Landing

Landing his plane on a paved street without damage was the feat performed at Hammond, Indiana, by a HUI, mail flyer. A wave in the plane's motor blew out, but the pilot brought his machine down safely through a maze of telegraph wires.

Monarchy Divides Germany

Many Incidents Show People Still Cling To Old System Of Rule

Many incidents are constantly happening in Germany to show that the people are still sharply and incurably divided over the question of the monarchy. At Breslau a motion picture of the city council to remove the statues of three former emperors, including the ex-kaiser, and to rename streets of hot water onto the pavement, snow and ice melt immediately and are drained away. The hot water, obtained free, saves the city large amounts usually spent shoveling and hauling snow off the streets.

The Hugs For Hire of a First-class

lightship requires an engine of seventy-two horse-power to work it. It can be heard at a distance of twenty miles.

You Can't Dye a Dress with Promises!

You can't dye a dress—no matter how careful you may be—without real color. That's the idea behind Diamond Dyes. The dye is in the dye, not in the water. From three to five times more saline than other dyes on the market.

Next time you want to dye, try Diamond Dyes. See how easy it is to use. Then compare results. Note the absence of that red-dyed look of streaking or speckling. Note the bright, looking colors are. Then observe how they keep their brilliance through wear and washing. If you don't agree Diamond Dyes are better dye, your dealer will refund your money. The whole package of Diamond Dyes is the original "all-purpose" dye for any and every kind of material. It will dye silk or wool, cotton, linen, rayon or any mixture of materials. The dye package is a special dye, for silk or wool only. With it you can dye your whole articles of clothing. The dye package is the best for a festival work. When you buy—remember this. The dye package dye silk or wool only. The whole package will dye any kind of goods, including silk and wool. Your dealer has both packages.

Diamond Dyes

Easy to use

AT ALL DRUG STORES

Cut Down Food Wastage

—by covering all perishable goods with Para-San Heavy Waxed Paper. Para-San moisture-proof texture will keep them fresh until you are ready to use them. You'll find the Para-San sanitary wrapped product handy. Use "Careful Pull" Package in sheet form for less exacting uses. At grocers, druggists, stationers.

Two newly rich profiteers had been
 staying at the same hotel for a month
 said one: "Well, Jim, what do you
 think of this hotel? Not bad, eh?"
 "Fine, Herbert; but there's one
 thing I don't like about it. They
 charge two bob for a bath."
 "Get out! Do they?"

Lawyer: "Then you say that this
 man was drunk?"
 Witness: "I do not. I merely say
 that he sat in his car for three hours
 in front of an excavation waiting for
 the red light to turn green."

College Professor: "One thing,
 Uncle, you've got to admit that col-
 lege makes a man think."
 Uncle Ben: "Yes. It makes him
 think he's better than anybody else."

 Subscription—\$2.00 a year in Canada
 \$2.50 to the United States

Life is a comedy to those who
 think — a tragedy to those who feel.
 Everybody seems satisfied with
 the Mexican revolution. Both sides claim
 important victories.

More terrors of the air — a new
 device enables us to hear plants grow
 by radio.

**ARE YOUR
 BUILDINGS INSURED**
 The ever present need for ade-
 quate fire insurance was forcibly
 impressed upon last week farm
 buildings to the value of thousands
 of dollars were destroyed by prairie
 fires in this district.

These buildings were insured
 against fire, but were not covered
 for loss by prairie fire, and the loss
 to the owners is the per cent.
 The fire insurance is ever present,
 both on the farm and in town. Build-
 ings should be adequately insured
 against fire, for if not insured, the
 result of years of saving and hard
 work may be wiped out in a few min-
 utes. It doesn't pay to take chances.
 Not only should fire insurance be
 carried, but fire extinguishers should
 be kept close at hand and ready for
 operation. They may save the owner
 a heavy loss, and they give an
 added feeling of security.

**ONE OF
 THE GREAT**
 The name of Marshall Pook, noble
 Frenchman and chief of the Allied
 armies during the latter period of
 the great world war, will go down in
 history as one of the greatest military
 figures. As a strategist and leader
 of men he will be ranked by histor-
 ians with Napoleon, Caesar, and
 Hannibal.
 Pook was a noble warrior, loved
 and revered by his men, and respect-
 ed by his enemies. Nothing finer
 could be said of any man.

**THE RIGHTS
 OF LAW BREAKERS**
 The sinking of the "Im Alone" is a
 sad incident, which both Canadian
 and American government offi-
 cials are showing some reluctance to
 investigate.

The boat was regarded by the Amer-
 ican coast guard service as a no-
 torious rum runner, and according
 to her captain, she carried 2,500
 cases of choice liquors when she
 sank in the bottom of the Gulf of
 Mexico. The case seems to be one
 of those borderline affairs where both
 sides had good reason for thinking
 themselves in the right. The boat
 was apparently there for the purpose
 of breaking the Volstead Act, and her
 Canadian registration was just a
 cloak for the carrying on of her net,
 illicit trade.

One result of the "Im Alone" in-
 vestigation should be a clear defini-
 tion of the rights of law breakers.
 It should be made clear just how far
 a rum runner can go before taking
 the law into his own hands. In other
 words, it should decide just what
 protection the British flag will give
 to the rum runner who is wanted by
 the American law enforcement offi-
 cials. The situation is a most un-
 pleasant one, and requires careful
 and friendly adjudication by the two
 nations involved.

SPRING GAME
 Last night Spring came
 And touched my hand;
 "Why walk the streets alone?"
 she said.
 "Is there no one to share the joy?
 Of melting snows
 With stars overhead?
 No one to brush
 Against your arm?
 No one your lonely hand
 To take
 And count with you the misty lights
 That twinkle to the dusky lake?"
 I laughed because
 Spring was so sad;
 Into my heart she could not see
 That through the dark and through
 the light,
 Love walks and talks and lives
 With me.

A Bright Girl's Answer
 An English paper tells this one:
 The inspector who had just returned
 from the Isle of Man, was examin-
 ing the girls' class in geography.
 "Can you tell me what there is of
 the English coast, which from its
 name you would judge to be inhab-
 ited by people of the male sex only?"
 "Please, sir, the Scilly Isles," re-
 plied a girl promptly.

Give "Em a Chance
 George: "Do you believe in clubs
 for women?"
 Earl: "Yes, if kindness talks."

**ALBERTA MUSKRATS
 SHIPPED TO ENGLAND**
 Ten pair of live muskrats were
 shipped from Edmonton during the
 past week to England. The ship-
 ment, the first of its kind to be made
 from Western Canada, will form the
 nucleus of breeding stock for a
 large English fur raising market.
 The shipment was made by A. C. Mc-
 Paden, who states that this trial
 proves successful, several thousand
 more rats will be shipped through
 the next few months. Further evi-
 dence of the rapid growth of this in-
 dustry is given by orders for breed-
 ing stock which Mr. McPaden has
 received from Czechoslovakia.

62 Horse Power

COMPARE Oldsmobile's 62 horsepower
 engine with the actual horsepower rating
 of other cars in its price-field — and you'll
 understand why the Finer Oldsmobile moves
 in a class of its own!

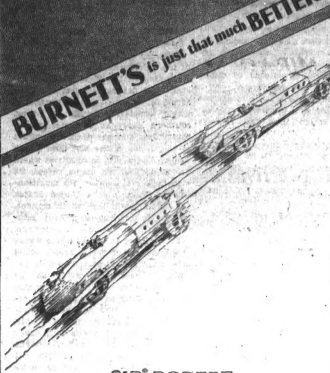

Then get behind the wheel of an Oldsmobile
 — adjust the driver's seat to the exact position
 that spells comfort and relaxation — and drive.
 Learn what 62 horsepower means in perfor-
 mance — speed in abundance — power to spare
 on the steepest hills — snap, verve and action.
 And smoothness that only Oldsmobile's exact-
 ing standards of precision engineering could
 accomplish.

For the finer Oldsmobile sets a standard of
 performance in keeping with the stylish
 beauty of Oldsmobile's Fisher Body, the
 comfort of its Lovejoy Shock Absorbers, and
 the luxury of its rich upholstery and ap-
 pointments.

Come in and see the finer Oldsmobile today.

ESTABLISHED 1770

URGENT ONTARIO PEOPLE TO TURN ALBERTA COAL

The Alberta Development Board, an organization which seeks to promote industry in Alberta, is making an effort to stimulate in Ontario a market for Ontario coal. The board is receiving assistance from boards of trade and other organizations in the province. The following letter has been written and is being distributed by the Calgary Board of Trade with the suggestion that Alberta people send it to a similar letter, to their friends and relatives in Ontario. Here is the letter:

"We want you to know something about Alberta domestic coal, which has kept our homes warm and comfortable under the most severe weather conditions, therefore it should be even more efficient in Ontario. Our furnaces and chimneys are the same as yours.

"I do not need to tell you that most of the money you spend for Alberta coal will go back to Ontario for your manufactured goods, so that when you buy Alberta domestic coal you are not only buying a clean and an efficient fuel, but you help two provinces, your own and ours, as well as yourself.

"Please phone your coal dealer. Tell him you want a load of Alberta coal. If you burn it according to directions you will tell me it is the finest coal you have ever used.

"Please let me hear from you soon.

Yours very sincerely,

Why He Didn't

"Rh, Jack, I didn't see ye in Kirk last Sunday."

"Did ye no? I was takin' round the plate."

AGRICULTURAL SCHOOLS CLOSE SUCCESSFUL YEAR

After one of the most successful seasons since their inception, the four provincial schools of agriculture closed for the 1928-29 term during the past week. President Brewster and Hon. R. O. Held were the principal speakers at the closing exercises at the Vermilion school; Hon. R. H. Macdonald spoke at the Olds school; and H. A. Craig represented the government at the closing exercises at Claresholm and Raymond. The number of young men and women students in attendance at the schools during the past term has been as follows: Olds, 236; Vermilion, 175; Claresholm 75; Raymond 44.

Of Greater Feminine Interest

The professor was showing a young woman the heavens through his telescope. He directed her gaze to a planet which he told her was Venus.

"Oh, isn't it perfectly lovely?" she exclaimed — and then "Now please show me Adams."

Bi-Lingual "Chanty" Sea Discovered

RALPH CONNOR

Ralph Connor, the well known Canadian novelist, collected recently from a half-breed voyageur in the Canadian Northwest a highly interesting folksong which will be sung at the Vancouver Sea Music Festival next January by Ulysses Paquin, of Montreal. This song is half French, half English, the first part being the story of a habitant Colin while the chorus is an English sea chanty, "Blow ye winds of morning". This bilingual song appears to have been popular many years ago at a time when while pine was exported in large quantities on the old sailing ships from Quebec which carried overseas the log, rafted down the St. Lawrence from the Ottawa River. The word "chanty" is considered by some authorities as connected with the "chanties" of the Quebec lumberjacks who frequently were sailors as well as woodmen and always sang at their work. According to Ralph Connor, the half-breed or metis from whom he recorded this song was a handsome chap with beautiful voice and manner and was a first-class canoeman. A number of purely French Canadian chanties as well as will be sung by Ulysses Paquin, at Vancouver, as the intention is to make this Sea Music Festival as Canadian as possible.

NATIVE FRUITS AND ORNAMENTS

(Experimental Farms Note)

"Pay-off little look green." This aphorism applies to more things than pasture.

We have wisely imported the caragana shrub, but largely neglected to cultivate the Saskatoon and buffalo berry. We plant the Scotch pine but forget the lodge pole and the spruce. We pay out good money for the Russian and northwestern poplars, but most of us fail to utilize the shapely, sweet-scented balsam of the algaed and the cottonwood. In our commendable quest for the variety of type and character contributed by exotics we are too prone to pass up the native species whose habits prove them adapted to our environment.

The Dominion Experimental Station at Beaverlodge, Alberta, has been rather restating these native plants. Conspicuous success has attended the culture of the Saskatoon in various hedges, as fruiting rose and as low windbreaks or snow catches. Failure attended ordinary methods of transplanting the Saskatoon, but when chunks of roots with all the top chopped off were strewn into a shallow furrow and completely covered up a slow but sure establishment took place and today, ten years after planting, these hedges attract as favorable attention as anything in the grounds.

Another large plant native in southern Alberta and recently introduced at Beaverlodge with promise of success is the hawberry or buffalo berry. Other native successively brought under cultivation are sand cherry, chokecherry, pincherry, mountain ash, snowberry, wild hawberry, wild rhododendron and dwarf birch.

A certain measure of success has been met with the dwarf hazel nut and the pomelo, or high bush cranberry, while silver berry is being tested.

Wild strawberries, raspberries, currants, and gooseberries have been tried but discarded in favor of the domestic sorts.

Among trees the balsam of gilead, the white spruce, and the tamarack have all flourished. And there are still more things to try.

MORE HOMESTEADS TO BE AVAILABLE IN NORTH

Some 6,000 homesteads or approximately 1,000,000 acres in the Grande Prairie district and in the Peace River block in British Columbia will be thrown open for entry in the near future, according to word received at the Department of the Interior, Ottawa. This area includes land formerly held as forestry preserves lying between the sixth meridian and the R. C. boundary line and bounded on the north by the south line of Township 31, and on the south by the Wapiti river. An additional area will also be surveyed and thrown open to homesteading. It is expected that entry may be made for some of these lands by about April 15th.

An Irishman and a Scotchman found themselves seated side by side at a certain Christmas "crab-dinner," and each tried to impress the other with the distance he had travelled.

After much discussion, the Irishman admitted that he had sailed the Seven Seas, among other trifles, and that he had been to the end of the end of the world.

"An' what did ye see there?" asked the Scot.

"Sure, and there was a great big wall reaching to the sky, me bhoy."

"Ah, well," said the Scot, "it's a peety ye didna look ower ye wall for I was behind it fishin' ye ken."

"That's enough from you," said the burglar to the loquacious woman, "If you so much as open your mouth again I'll shoot you."

"Say, fellow," put in a meek-looking husband after a few moments' silence, "how much will you charge to stay here by the month?"

Conspicuous by His Color

Woman: "I was to have met my husband here two hours ago; have you ever him?"

Firewalker: "Possibly, madam. Anything distinctive about him?"

Woman: "Yes, I imagine he's purple by this time."

The Doctor's Orders

They the doctor's orders carefully in every minute detail relating to the giving of medicines. Otherwise you may unintentionally defeat his best efforts.

The doctor determines by careful examination the proper remedial corrective drugs in the exact proportion that they must be blended in the mixture which he entrusts to the dispensing druggist.

All Medicine

Which is prepared in our prescription department can be relied on to be skilfully and conscientiously compounded from the purest and highest quality materials that money can buy. We take particular pride in our dispensary. Prescriptions are filled with exacting care, under perfectly sanitary conditions by qualified pharmacists. Prescriptions received by mail are promptly and carefully dispensed and shipped.

Sick Room Necessities

We can supply Hot Water Bottles, Fountain and Bath Syringes, Bed Pans, Ice Caps, Feeding Caps, Air Cushions, Fever and Bath Thermometers, Medicine Tubes, Surgical Dressings, and all other sick room requisites.

STILES "The Druggist"
Bassano and Hussar

Do you know why **McLAUGHLIN-BUICK** rides so much more comfortably than other cars? Here are three important reasons

McLAUGHLIN-BUICK'S famous cantilever springs—the most expensive type of springs employed on any car in the world, coupled with the famous McLaughlin-Buick torque tube drive—are designed solely for comfort, not for transmission of power, and provide the maximum degree of riding restfulness.

McLaughlin-Buick's Lovejoy hydraulic shock absorbers . . . front and rear . . . absorb the jars and jolts of the roughest roads, thus adding still further to the buoyancy of McLaughlin-Buick travel.

And McLaughlin-Buick's deep, soft seat-cushions, together with the lounging spaciousness of McLaughlin-Buick interiors, provide unequalled riding luxury for every passenger.

McLaughlin-Buick offers the highest standard of motoring comfort ever attained; and this is one vital reason why more motorists drive McLaughlin-Buicks than any other fine car.

Local News

Mrs. Jas. Johnston and Miss Irene Johnston were visitors to Calgary this week.

Miss Halford, of Calgary, has accepted a position on the nursing staff of the Bassano Hospital.

W. King, principal of Bassano high school, went to Calgary on the Wed. noon train.

Robt. McLenn, K. C. was a business visitor to Calgary early in the week.

Mrs. A. M. Anderson returned of her home in Coonstee, after spending the past winter visiting in Eastern Canada.

Harold Runnison was home in Calgary Easter Sunday.

Stephen Johnson, principal of Wayne school was in Bassano for the Easter holidays.

Miss Irene Johnston is home for the Easter holidays, she is teaching at Pilegastree school, near Chancerville.

Leonard D. Nesbitt and George Chard, of the Alberta Wheat Pool, passed through Bassano last Friday noon.

Jimmie Wright went home to Gleichen for the Easter holidays.

Dr. B. E. Barlow was in Calgary last Friday.

Miss Violet King and Orline Hartley spent the Easter week in Calgary.

Charlie Blazier, the Brooks Annapole rancher, was in Bassano last Thursday and Friday. He expects to have a nice bunch of antelope this year.

Miss Mary Cathro, student at the C. C. L., Calgary, is home for the Easter holidays.

School Inspector J. F. Boyce spent the Easter holiday in Red Deer and Edmonton.

Miss Irene Magee was a visitor to Calgary over the week-end.

Jimmy Donaldson, of Carleton Place, was home for the Easter holiday.

Mr. and Mrs. W. E. Sambrooke and Mrs. W. Rodmond motored to Calgary on Monday afternoon.

Miss C. Napier, of Calgary was the guest of her sister, Miss J. H. Donaldson over the week-end.

Donald MacGregor, of Warden, was home for Easter, proceeding to Edmonton for the Teacher's convention.

Miss M. Hattie spent the week-end in Calgary.

Dr. Geo. Haworth spent the week-end in Edmonton.

W. Calver, of Carleton Place spent Easter at home in Bassano.

Ralph Johnson and two scout friends of Calgary spent Easter in Bassano, the guests of Mrs. H. S. Johnson.

A. Johnston, of Vulcan, was a visitor in Bassano over the week-end.

Ellis Little left on Friday for Lethbridge on a three weeks vacation.

Mr. and Mrs. Dan McLeod spent the week-end in Calgary.

Mrs. Agate, of Canby, was a visitor in Bassano on Monday.

Jim Henry returned to Bassano on Monday after spending a vacation in Seattle.

Miss C. Hopkins and Alta went to Calgary on Wednesday.

Miss Quentin Bramley went to Calgary Wednesday to take part in the musical concert, which is being held Thursday in the First Baptist Church.

IN MEMORIAM

In loving memory of Weldon Cyr, who fell asleep three years ago.
"Some day, some time, our eyes shall see that dear face held in memory."
Father, Mother and Leland.

Fizz Boilage

The irrepressible Lord Dewar, of wit and whisky fame, met a Miss Porter-Porter, who considered her compound appellation a social asset of considerable importance. Inadvertently he addressed her by only half of her name.

"My name is Porter-Porter—with a hyphen, my lord."
"To be sure," came the adroit reply. "And my name is Dewar-Dewar—with a hyphen."

Efficiency

Customer: "When I put the coat on the first time and buttoned it up, the seam burst down the back."
Tailor: "Yes." Well, that shows how well our buttons are sewed on."

Why suffer with Skin Troubles

When the delicate, sensitive skin of the face is afflicted with eruptions, pimples, spots, and all forms of skin troubles, the use of **Glicura** for purity is the only remedy.

Glicura for purity is the only remedy.

WORLD HAPPENINGS BRIEFLY TOLD

The Canadian Pacific Railway contemplates constructing a modern hotel in London, England, it is revealed in the annual report of the company.

Over two-thirds of the immigrants who entered Canada during the ten months of the current fiscal year came either from Britain, the United States, or Germany.

The Dominion population this year celebrates its 40th birthday, the first anniversary of Confederation.

For the eleven months of the current fiscal year April 1, 1928, to February 28, 1929, immigration to Canada totaled 52,911, an increase of 13,079, or 12 per cent, over the corresponding period in 1927-28.

Rebulet racing is to be tried in Vancouver where a stud of twenty reindeer has been established, and six Eskimo drivers are being trained to race their reindeer stunts round the track.

The British Admiralty has awarded a "good service" medal of £750 per annum, beginning March 1, to Captain Kenneth C. B. Dewar, former commander of HMS. Royal Oak, who figured in a notable commercial at Gibraltar last night.

Carl H. Nelson, of Hahn, N.D., pilot for Captain Sir George Hubert Wilkins on his North Pole flight, was awarded the Harmon trophy for 1928, which is given to the U.S. fleet making the greatest contribution to aviation during the year.

A Vancouver dispatch to the Montreal Gazette says: "The Duke of Gloucester (Prince Henry) who has left London for Japan to invest the Emperor with the insignia of the Order of the Garter, is expected to return home via Canada. It is understood the Duke will spend a holiday at his brother's ranch at High River, Alta."

Talks Over Telephone

Germany To Winnipeg

Reg. Business Man Wanted To Hear How Family Was

Telephone communication between Germany and Winnipeg has been established for the first time.

Peter Anderson, Winnipeg business man, who left the city January 22, on a journey chiefly designed to restore his health, was in Wiesbaden, thousands of miles away from home. No letters from home having overtaken him as he moved about, he was anxious to hear what was happening of his family back here.

Taking down a telephone receiver he put in a call, and shortly afterwards his young daughter at 508 Wolsley Avenue was saying to her mother: "Germany wants to speak to you Mammy."

Mrs. Anderson said that she could hear what her husband said "pretty distinctly." "I just wanted to know how we were," she said. The cost was just over \$56. Telephone officials said the conversation began less than two minutes after the Winnipeg connection was made.

Crop Acreage On Reserves

The total area under field crops on the Indian Reserves in Canada, in 1928, according to figures collected by the Dominion Bureau of Statistics in co-operation with the Department of Indian Affairs, was 201,287 acres.

It is stated that elephants are very bad sailors. "The probability explains why no few sea-faring men adopt them as pets."

Feeling Run Down?

Over 400,000 women and girls who were weak, "blue", nervous, run-down, and unable to do their work properly, have improved their health by taking Lydia E. Pinkham's Vegetable Compound. By regular use, 98 out of every 100 report benefit. You can be assured that it will help you too.

Increases Worth Of Autogiro

New Invention Allows Machine To Rise Almost Vertically

John de la Cerva, Spanish inventor of the autogiro, has solved the problem of starting his strange aircraft from the smallest possible field, according to the aeronautical expert of the Morning Post.

The new development of the autogiro, the expert said, starts the upper "windmill" blades revolving before the craft moves forward, thus permitting the pilot to lift the machine into the air with a minimum run.

The autogiro has a front propeller, and the upper or windmill blades. Previously it had been necessary to spin the upper blades by hand before ascending.

The necessary 140 revolutions per minute could not be attained on the field and the autogiro took a longer run than the ordinary airplane before rising. It was able to hold an almost stationary position in the air, however, and to descend on a much smaller space than the ordinary plane.

Money In Fish Scales

Product Makes Essence Used In Manufacture Of Jewelry

The boat of the modern meat-packing industry, that all the pig is utilized except its squeal, is now followed by the announcement of the Maine fishing industry. That all the fish is being utilized, even its scales.

Pearl essence plants at Portland, Me., at other points along Maine's coast are offering seven cents a pound for fish scales, and tons of scales formerly discarded by fishermen have been sold this season at a total price estimated at \$250,000.

One hundred pounds of the scales, for which the essence factories pay \$7, are required to produce one pound of pearl essence, valued at \$125 in the New York market. The essence, after elaborate processing, is used in the manufacture of beads, necklaces and miscellaneous jewelry.

Nahanni Country Gold Rush

Prospectors Going Into Dangerous Part Of Unknown North

The richness of the Saskatchewan river sands is exhausted, a new gold rush is now starting into the Nahanni country west of the Mackenzie river, and more than 1,000 miles north of Edmonton. Airplanes are taking in prospectors who are following the air trail blazed last summer by Jack Hannum's N.A.M.E. machines. Traces of the old McLeod diggings have been found, and one of the McLeods is back to help rediscover the placer deposits which have cost more than one human life since their first discovery in 1904.

Heavily armed Indians and fugitive whites have combined to make Nahanni a dangerous part of Canada's unknown North.

Six Charles Grant Robertson

Vice-Chancellor and Principal of the University of Birmingham on his first visit to the Dominion at the invitation of the National Council of Education to be a guest and speaker at the conference on "Education and Letters" to be held at Victoria and Vancouver, early in April. He will also address meetings at a number of cities on his way to the coast. His subject will be "Empire Builders" and such names as Drake, Rhodes and the Stanford family who have been among the subjects of his lectures. Sir Charles was tutor to the Prince of Wales at Oxford from 1912-1914, and his life has been full of movement and creative work since that time.

There is a rule in India that a younger daughter may not marry before the elder. In case the younger wishes to marry before the elder, it is difficult to get a divorce from any of them.

There are approximately 216 miles in Finland, totaling 40,000 seats.

Another Arctic Trip Planned

Captain Bartlett Will Use Tub-Like Ship To Explore Ice Fields

There's a big job yet to be done in the Arctic and Captain "Boh" Bartlett, who has sailed the seas for 40 years, been shipwrecked 12 times and seen four of his own ships sink in the ice.

It is going to fit up a ship, with enough beam to sit it almost as wide as it is long, literally a tub, take it into Bering Strait, let it freeze into the ice, and drift across the polar region into the Atlantic on the other side.

The ship will be equipped," he said, "with large deck space fitted up for laboratories and oceanographic work. We'll have all sorts of instruments for determining the depth of the water, magnetic conditions, tidal currents and for making meteorological observations."

"We can study weather conditions, find out where storms are born, learn about the aurora borealis, dredge for polar bears and fauna, and determine the ocean floor up there. This will all have to be done from ships' rather than from the air."

"Science's got to do it—it's the last great geographic project to be done in the world today, and the biggest assignment waiting in the Arctic."

Captain Bartlett already has the engine for his new ship, and the plans, and it will shortly be constructed in England. He has the money. He figures on a crew of eight men only.

"They must be young fellows, ambitious, willing to work, and able to double in several roles. Two will have to be pilots as well as sailors, and accountants, for we will take two aeroplanes."

When Stefansson took the "Karluk" into the Alaskan waters, where it was abandoned by much bad luck, and was finally crushed with the ice, Captain Bartlett was the ship's master.

As Captain Bartlett now plans it, the project will cost about \$300,000, and the expedition will be gone three years.

A Logical Conclusion

An elderly woman was taken to see a football match in which her son was playing. After watching for a few moments she inquired:

"What is the—er—object of this game?" said she, "to put the ball in that net."

"Why?" said the woman, with one of those rare flashes of genius, "it would be much simpler if they would get out of each other's way."

Canada will be the host, during April, to a party of 140 young Americans, members of the Young Americans League.

"130 languages and dialects are spoken by the 46 races of the world," says the Y.A.L. Bulletin.

"Can you imagine the arm of the ocean around a pocket of land?"

Minard's Liniment

Is a Great Preventive, being one of the oldest remedies used. Minard's Liniment has relieved thousands of cases of Grippe, Bronchitis, Sore Throat, and many other ailments. It is an Elixir to Germ. Thousands of bottles being sent every day. For sale by all druggists and general dealers.

Minard's Liniment Co., Ltd., Vermont, U.S.A.

Flu

Claims Many Victims in Canada and Should be Guarded Against

Several Positions Are Open On Staff Of League Of Nations At Geneva.

Opportunity for young Canadians who wish to live in the beautiful city of Geneva, and to become associated with the work of the League of Nations, is offered by a notice from the Civil Service Commission of Canada.

The chief position advertised is that of secretary of the narcotic division of the permanent central board of the League. Applicants must speak both French and English, be under forty-five years of age, have had knowledge and experience of administrative and secretarial work, and be trained statisticians. Preference will be given to those having experience or knowledge of the narcotic problem, and any familiarity with the languages of Eastern and Far Eastern countries. The salary attached to this post is about \$4,500 per annum.

It is stipulated that a salary of approximately \$1,700 a year is also required for the same division who must be bilingual and well qualified in commercial statistics. A secretary shorthand and typist is the third job, which calls for an experienced stenographer with some knowledge of drafting, filing and translation. This post carries the salary of \$1,700 per annum. Annual increases of \$50, per cent for the two last jobs up to a maximum of \$2,500 a year.

Those interested are requested to send their applications not later than April 1st, to the Secretary of the Appointments Committee of the League of Nations, at Geneva.

It is pointed out by the Dominion as the central headquarters of the League of Nations Society in Canada, that quite a number of Canadians have made outstanding reputations in the work of the League, at Geneva, and that positions of those kind offer a splendid opportunity to ambitious people from the Dominion as promotion or transfer to more important work is practically certain.

The following text recopies solve the problem of a tasty luncheon without meat:

A Meatless Luncheon

The following text recopies solve the problem of a tasty luncheon without meat:

Tomato Chowder

2 cupsful Borden's St. Charles Milk.

1 pint hot tomato.

1 medium sized onion sliced thin.

1 tablespoonful butter or butter substitute.

4 tablespoonfuls flour.

2 teaspoonfuls sugar.

3 teaspoonfuls salt.

1 teaspoonful pepper.

1/2 teaspoonful nutmeg.

6 water crackers split.

Melt the butter in the top part of the double boiler, add the onion, and cook it gently till yellowed, about five to eight minutes. Four in the milk and water, set over the lower part of the double boiler and scald. Mix the flour, salt and pepper with enough cold water to make a smooth cream; stir it into the milk, and cook about fifteen minutes, stirring occasionally. Heat the tomato with the sugar, when boiling, add the soda and combine it with the thickened milk. For serving, put a split cracker which has been dipped in warm water, in each plate.

One of the "Young Ambassadors" who visited Canada last summer, Frederick Thomas Mac, of Old Kent House, London, England, was taken to Canada to take up farming.

Nearly ten million fish eggs and fry were transported over the Canadian National lines in 1928, for the stocking of lakes.

One Of Strangest Trades

"Swamp Miners" Of New Jersey Probe Mud For Hidden Cider

A rapidly diminishing race of men known as "swamp miners" ply one of the world's strangest trades in the wooded swamps and creeks of South Jersey—probing hundreds of feet into cedar logs buried a thousand years ago.

The miners have become an interesting spectacle as the strange nature of their trade which they have devotedly followed for generations in the secluded villages near the Atlantic coast.

Like gold miners the "swampers" work "claims" in the swamps and creek beds which make that part of New Jersey a mine of waterways comparable to the English tin country. George H. Cook, of Rutgers College, Assistant State Geologist, said one log 4 thousand years old was brought to the surface.

The "swamp miners" have found their trade very profitable but it is said to necessitate hardiness, experience and skill. Standing in the cold, brackish water up to their waists, they push along iron spades into the mud where they think there may be hidden treasure.

After locating a log they loosen a chip and bring it to the surface. It is said the miners can tell by smelling it whether the log was blown down alive or fell over dead. Only live logs can be used. After paying the owner of the log, they smelt it on the surface as rapidly and buoyant as a newly fallen tree.

From the logs high-grade iron shingles, cedar chests, and other articles, are made.

CHAPTER XVII—Continued

"Oh yes," he replied absently.

"You were gone for some time this morning she stated."

"Yes," he occurred, "I went up to bring Connie."

"Oh."

Janet's fine eyebrows lifted slightly, and she looked at Donald with a curious intention. "Why didn't she come?"

"She wasn't home."

Her woman's intuition long ago told her that the "woodpile" as Donald called Connie, was madly in love with him. As she looked at him now and noticed his pre-occupied air, a pang of jealousy shot through her heart like a spear.

Was it possible that he had begun to value the wild girl of the woods more than a child, and that she loved for her had been kindled in his heart? The thought made her feel faint and she tried to put it from her mind.

Lucas was finished now and they were walking back to the lake. Douglas invited them to take a trip around the lake in a motor-boat, to which they assented gleefully.

Janet hesitated as Donald turned away with Watnwright. "Are you coming Mr. McLean?" she called.

Donald turned and shook his head. "I may be needed here," he said briefly.

Janet flushed to the roots of her hair and bit her lip in pain. She was not used to being thwarted in her desire.

Donald and Watnwright seated themselves on a bench under the trees and waited for the boat to arrive. The low and lighted cigarettes, Donald was lit at ease. The sound of Connie's tragic sobbing was ringing in his ears. He could see her little figure writing on the ground in a tempest of grief that had torn at his heartstrings. He sprang involuntarily to his feet and began pacing the ground with quick, nervous strides. Watnwright glanced up at him interrogatively.

"Yes, I was worried," he volunteered.

"I am," Donald admitted briefly.

THINNESS

Over-thinness is detrimental to a child's progress in growth and health.

Scott's Emulsion

of vitamin-rich cod-liver oil is a body-building food and tonic that overcomes thinness and helps build up a sturdy body.

Scott & Bown, Toronto, Ont.

W. N. U. 1779

Donald was in a writer of indiscreet. How should he brook this attack subject? Although poor as he the provincial churchman, his manner, that in no way interfered with his infantile courtesy, but that showed a certain dignity in his bearing, a certain dignity in his manner. He had raised in the wilderness for many years, but none could say that they had any more respect of his affairs at this moment than on the day of his arrival.

Donald decided to take the plunge. He sat down on the bench beside Connie's father and related the scene he had witnessed that morning at the house of the priest. He told of the scene before the mirror with the magazine page pinned to the legs of the struggle with her hair; of the floor sack, and of the pitiful sobbing of the heart-broken child.

Watnwright's face flushed painfully. There was a look of poignant suffering in his grave eyes. Of all the races in the world, the English, especially of the better class—fight most stoically to hide their distress. Watnwright leaned forward, his throat working convulsively as he struggled to regain composure.

"I hope you do not consider me presumptuous," he said, Donald, a note of anxiety in his tone.

Watnwright's hand reached forth to clasp Donald's firmly. "No, I do not doubt your sincerity. An inordinate sense of pride has kept me in my present circumstances. This circumstance you have related has helped me to a realization that I am a selfish pride, as it has denied Connie the privileges to which she is entitled. There is nothing I am going to do on my own in this self-condemnation, that can even partially console or palliate my stupidity. I should have known that she would require proper clothing now that she is grown up. As a matter of fact, she has, my distress aside, 'my mistake was at a low ebb.'"

"How did she come?" asked Donald, hoping to relieve Watnwright's embarrassment.

"Nonsense,"

Donald's head came up with a jerk. "What?" he almost shouted.

"She is nephew," Watnwright replied, a peculiar expression in his eyes as he noticed Donald's bewilderment.

"Nonsense!" Donald re-echoed, a benighted look on his face. "Great Scott! This is a surprise. I thought Connie as being not more than four or five."

"Connie's healthful outdoor life has tended to keep her young, and her mode of dressing enhances the youthful effect," said her father as he sat down wearily, a far-away look in his eyes. "Her mother," he went on slyly, a tremor in his voice, "was just like her, at the age of five, she looked almost a child."

It turned to Donald. "No doubt you have wondered why I buried myself in this wilderness?"

Donald nodded. "At this moment they were interrupted by members of the Sports Committee, who wanted Donald's advice on a matter pertaining to the afternoon's programme."

It was evident to Donald as he withdrew that Watnwright had been about to disclose his past history, a history which had been locked in his heart these many years.

At three o'clock the motor-boat, driven through the race-course. The centre of the valley had been cleared of underbrush, and the long grass burned under the watchful eye of the fire-ranger. A small creek and a few swampy places had been "cordoned off" with cedar poles and then covered with soil. A judge's stand, with a few hastily erected seats for Janet's party, stood near the finishing post.

The horse-race as has been said, was to be the feature of the day.

The crowd surged happily from the lake-shore to line up in orderly ranks about the oval.

The brilliant and diversified outfit of the Klootchman's skirts and head-gear showed in bright contrast with the drab wearing apparel of the white men. The Swahili Indians were dressed in handkerchief clothing as to trousers and coat, but one or two wore wide-brimmed cowboy hats and displayed sily handkerchiefs of gorgeous hues, knotted at the throat to drape their shoulders elegantly.

Three husky farmers came from Pemberton rode to the starting-line amid hearty hand-clapping and shouting from their friends. A few curly-skinned riders, mounted on spirited black cayuses, came prancing through the crowd. He lifted his hat and saluted in acknowledgement of the cheers of the spectators. This was Joe Lafont, the half-breed who had won first prize at the Lillooet races for six past two seasons.

One of the white ones asserted that Paul Young, of the Indian contingent, would give him a hard race. Paul John's cayuse, was sleek, his skin gleaming, and he had run the half-breed's

I've forgotten. I never had any nerves

WRIGLEYS

after every meal

horns a close second. Money was being placed on all sides, particularly by the Indians, who are inveterate gamblers. Amid an excited babble the crowd opened up, and the horse and rider that came tearing down the course like the wind.

"Look!" Donald shouted excitedly as he seated Watnwright's arm.

"Down the course, riding like a spirit of the woods, came the girl, her hair blowing about her face, sitting astride her mettlesome horse and riding as if the wilderness belonged to her alone."

Pegasus was not used to crowds. With arched neck and quivering flanks he reared on his hind-legs to shake his rider, then he fell back like a rabbit, Connie sat on the bare back of her adored cayuse as though a part of the animal, her slender body swaying in a gentle undulation in perfect co-ordination with the movements of the horse. She was hard set to keep from running over the other riders who sat morose apes.

Connie was unknown to the great or part of the crowd. To them this middle-aged hair blowing about her face, sitting astride her mettlesome horse and riding as if the wilderness belonged to her alone.

She was hard set to keep from running over the other riders who sat morose apes.

Connie was unknown to the great or part of the crowd. To them this middle-aged hair blowing about her face, sitting astride her mettlesome horse and riding as if the wilderness belonged to her alone.

Pegasus was not used to crowds. With arched neck and quivering flanks he reared on his hind-legs to shake his rider, then he fell back like a rabbit, Connie sat on the bare back of her adored cayuse as though a part of the animal, her slender body swaying in a gentle undulation in perfect co-ordination with the movements of the horse. She was hard set to keep from running over the other riders who sat morose apes.

Investor's Claim Unusual

Wisconsin Chemist Says His Mechanical Device Can Be Used to Claim that he has invented a mechanical device which is capable of being "thought" is made by Dr. H. D. Barnstead of the University of Wisconsin, professor of chemistry department, following a challenge issued six months ago by C. L. Hull, professor of psychology at the state school.

Dr. Barnstead's "thinking" apparatus consists of numerous switches, wires and an incandescent light. The mechanism, he said, is so arranged that the bulb may be lighted by one of the switches that is of the other switches may be "taught" to light the bulb. The operation he claims, is analogous to the presentation of stimuli.

"The machine," Dr. Barnstead declared, "is merely a symbol of mechanism of the human body."

Little Helps For This Week

"Do thy diligence," 2 Timothy iv. 9.

There lies no desert in the land of

For 'em that treat that barrenest

Labored of the heart and hope

With heaven's harvest and rich gathering

When you awake in the morning, and when that heavy pain wakes too,—oh, so sharply!—and the burden of a monotonous life falls down upon you, or else like a dead, blank wall before you, making you turn round on your pillow, longing for another night instead of an inopportune day, rouse yourself. Remember what you are—a child of God; say, "What have I got to do today?" Not you, but let me enjoy or suffer? But "What have I to do?" Don't try to be happy, but try to work, work for God, and happiness will come.

Externally Dr. Internally, It Is Good—When applied externally by

rubbing Dr. Thomas' Electric Oil opens the pores and penetrates the tissue, touching the seat of the trouble and immediately affording relief. Administered internally, it will kill the bacteria in the throat, which induces coughing and will relieve affections of the bronchial tubes and respiratory organs. Try it and be convinced.

CARS ARE NOW
THE LOWEST PRICED CARS IN THE WORLD

4-DOOR SEDAN	\$1,115	DE LUXE COUPE with	
COUPE	\$1,045	rumble seat	\$1,095
CLUB SEDAN	\$1,085	ROADSTER; rumble seat	\$1,075

If Quality and Economy Appeal to You, Consider these Points

Chrysler's standardized precision methods of manufacture means quality built into the Plymouth cars as well as the more expensive Chrysler models.

Chrysler Plymouth cars excel in gasoline and oil consumption, upkeep, and repairs.

Locked hydraulic 4-wheel brakes are self-equalizing and eliminate constant attention. It is not an uncommon occurrence for a Chrysler built car to go 25,000 miles without a single brake adjustment.

Chrysler Plymouth bodies are more roomy and comfortable than any other car in its price class or even higher. Builders heavily built double braced.

Chrysler and Plymouth cars lead in re-sale value as a used car.

Chrysler Plymouth engines have more main bearing surface than most low priced six cylinder cars on the market, and unlike cars in its price class, has full force feed lubrication.

Mrs. W. S. Playfair and daughter Winnie went to Calgary on Wednesday.

CARD OF THANKS

We wish to thank the many friends who were so kind to us during our recent bereavement. Especially Mrs. and Mr. Wright of Hinton, and James George of Gem. Also for the beautiful floral tributes John Cameron and Children.

W. I. Will Give Free Course In Interior Decorating

Instruction on interior decorating will be given under the auspices of the Bassano Women's Institute from April 28th to 16th. The instructor is a representative of the provincial government. Morning and afternoon classes will be held, and there is no fee for the course. All ladies, whether members or non-members, are cordially invited to attend.

Those who wish to take the course are requested to notify the W. I. secretary, Mrs. E. E. Graham. The Women's Institute held their regular meeting last Tuesday afternoon. Further plans were made for the improvement and care of the cemetery after some discussion on the subject.

THE PASSING OF MRS. JOHN CAMERON

Mrs. John Cameron, of Hinton, after a serious illness of several weeks died in the Bassano Hospital on Sunday, March 31st.

The deceased was born in St. Andrews, Scotland, and was before her marriage Miss Beatrice Reid. In 1916 she came to Canada and was united in marriage to John Cameron. They moved to their home near Hinton, Alta., where they had lived until her death.

She leaves an aged father, a brother and sister in Scotland and a husband and three children, and many friends who will mourn her loss. The funeral took place from the Presbyterian Church, Bassano, on Wednesday, April 3rd. The Rev. P. C. McCrae conducted the services. The pall bearers were Roy Larson, M. N. Fries, Jack Wallace, B. Park, J. H. George and Mr. Grieve. The remains were laid to rest in the Bassano Cemetery.

THE CHURCH OF THE BLESSED VIRGIN

Holy Communion and Sermon at 11 a.m. 1st Sunday in the month. Matins and Evensong at 11 a.m. 2nd and 5th Sundays in the month. Evensong at 7:30 o'clock p.m. on 2nd and 4th Sundays of the month. Canon R. D. Hamilton, Rector. H. O. Dine, rectory warden. J. H. Donaldson, people's warden.
